

# Oracle PL/SQL Course Content

**Topic 01: SQL**

**Topic 02: Main features of 9i and 10g**

**Topic 03: Basic SELECT Statement**

**Topic 04: Ordering The Output**

**Topic 05: Conditional Retrieval of Data**

**Topic 06: Pseudo Columns and Functions**

**Topic 07: Working With Character Functions**

**Topic 08: Working With Date Functions**

**Topic 09: Using Non-Character Function**

**Topic 10: Using the SET Operators**

**Topic 11: Aggregating Data Using Group Functions**

**Topic 12: Creating Subqueries**

**Topic 13: Enhancing Group Functions**

**Topic 14: Transaction Control Language**

**Topic 15: Processing Hierarchies**

**Topic 16: Data Manipulation Language**

**Topic 17: Data Definition Language**

**For PL/SQL Training Contact: +91 9885022027**

**Topic 18: Using Declarative Constraints**

**Topic 19: Other Database Objects**

**Topic 20: Database Security**

**Topic 21: PL –SQL**

**Topic 22: Blocks**

**Topic 23: Variables**

**Topic 24: Control Structures**

**Topic 25: Cursors**

**Topic 26: Error Handling**

**Topic 27: Procedures**

**Topic 28: Functions**

**Topic 29: Packages**

**Topic 30: Design Tips and Techniques**

**Topic 31: Triggers**

**Topic 32: Dynamic SQL**

**Topic 33: Oracle Supplied Packages**

**Topic 34: Collection Datatypes**
