

QlikView

Online Training

Trainer : 14+ years Experience

Become an expert in Data Modeling and Data Visualization with Qlikview .

The course is designed for professionals who want to learn Data Modeling & Dashboard techniques by using Qlikview. Qlikview course is specifically made for professionals who want to learn to use and Develop Qlikview Applications for business intelligence and to bring visual insights to the data. This course covers all the concepts of Qlikview tools like Data Interpretation, Designing, Modeling and then dives into advance features of Qlikview like Analyzing the data, Discovering the hidden data and generating attractive graphs and charts

Course starts with basics and builds on gradually. Each session starts with a conceptual overview followed by hands-on examples to reinforce concepts

Course Objectives

At the end of the course the participants should be able to:

1. Apply various visualization and modeling techniques
2. Implement Qlikview features like In-memory, Associate and Decision-making
3. Perform Data Analysis
4. Access the multiple charts / tables / objects for Dashboard analysis
5. Work on a real life Project, implementing data into image for Dashboard

What are the pre-requisites for this Course?

There are no such pre-requisites for this course, but if you have some knowledge of file type, SQL, DWH, RDBMS then it will be beneficial.

Qlikview 11 Online Training Salient Features

Complete Hands On Training
In-depth Discussion on each and every topic
Real Time Scenarios Discussion
Training will be Basic to Advanced
Interview Questions Discussion

Become QlikView Developer from Scratch
